We take care of sampling and analysis of your (drinking, sewage, bilge) water on board and issue approved water certificates, a service we provide in all major ports worldwide. In case of contamination of drinking water on board, we can supply disinfection products services and consultancy to provide cleaning solutions. All services are available on request. Assistance of tugboats —if required— is for customer's account. When tugboat companies increase their tariff in case of ice drift —according to the port's custom— the price of drinking water will be increased accordingly. Hatenoer-Neptunus BV water supply cannot be held responsible for the performance of its products within any application determined by the customer, who must satisfy themselves as to the suitability of the product. The delivery of goods and services of Hatenoer-Neptunus BV are subject to the General Conditions that have been deposited with the Court of Rotterdam (54/2014) and with the Chamber of Commerce Rotterdam, the Netherlands, under number 24043767. These conditions can be consulted on the website of H.N. (www.hatenboer-neptunus.com) and will be sent upon first written request without charges. The applicability of principal and/or counterpart general terms and conditions is explicitly rejected by Hatenoer-Neptunus BV.
